

Alpine Card Note

Bluetooth Firmware KCE-400BT / IXA-W407BT Update 3.11

Dear Alpine Customer,

We would like to inform you that before you attempt to carry out any Bluetooth firmware **downgrade** on the KCE-400BT or the IXA-W407BT you should first check the serial number has not had the letter "B" (400BT) or the letter "C" added to the end of it.

Hardware that has the additional letter **IS NOT** downgradeable below the firmware version 3.11.

Model

Serial Nr

KCE-400BT: >00635361B -> The letter "**B**" added to the end of the serial Nr for easy identification.

iXA-W407BT: >00714301C -> The letter "**C**" added to the end of the serial Nr for easy identification.

If an attempt to **downgrade** is carried out, **IT WILL** result in the hardware becoming defective, for more information on this matter please contact the Alpine office for your country.
